Beeline Routes

1.   Beeline routes are generated from big transport data such as trips on the public transport network and crowd-sourced route suggestions on the website (www.beeline.sg).

2.   By running algorithms on the millions of trip records gathered each month, we identified travel corridors with sufficient demand and which could result in significant time-savings for commuters.

3.   The following routes are scheduled to run from 3 August 2015. Each Beeline bus will make no more than five stops around each originating area before going directly to the destination where it would again make a few stops.

	Originating Area	**Expected time of departure at origin**	**Destination Area**	**Expected time of arrival at destination**
1	East Coast Road (5 stops)	7:45 am	Shenton Way (4 stops)	8:16 am
2	Tampines Street 83 (3 stops)	7:20 am	Cross Street (2 stops)	8:13 am
3	Punggol Central (4 stops)	7:20 am	Cross Street (2 stops)	8:13 am
4	Pasir Ris Drive 4 (3 stops)	7:20 am	Cross Street (2 stops)	8:13am
5	Anson Road (5 stops)	6:30 pm	East Coast Road (5 stops)	7:00 pm

More Beeline routes might be introduced depending on suggestions from commuters on the Beeline website. Commuters can view and book the latest routes using the Beeline app.
